\* The tasks and positions listed on the chart do not include all positions, functions, or tasks which may require a background check. All Medical Center positions are considered critical and subject to background checks.

PPSM 21.E applies to all employees and applicants for staff positions. Many Senior Management Group positions will be designated as critical in accordance with the position elements, functions, or tasks identified above.

\*\* A criminal conviction background check will document any felony or misdemeanor convictions. Locations utilize either: a campus or local police department or human resources department to conduct Live Scan fingerprinting and initiate a Department of Justice (California) and/or FBI (national) criminal conviction background check; or a Consumer Reporting Agency (e.g. ChoicePoint, Kroll Inc.) to conduct a criminal conviction background check.

In addition to the background checks listed within the systemwide guidelines, other types of background checks may be required (in line with operational needs, legal requirements and other relevant considerations). For example, a location elects to conduct a credit report on an employee in a critical position who has direct access to cash and cash equivalents. The types of background checks that a location may utilize include, but are not limited to: employment and reference checks; credit reports; Department of Motor Vehicles pull notice program; and required health screenings (e.g. TB test or other tests pursuant to DOT regulations).
